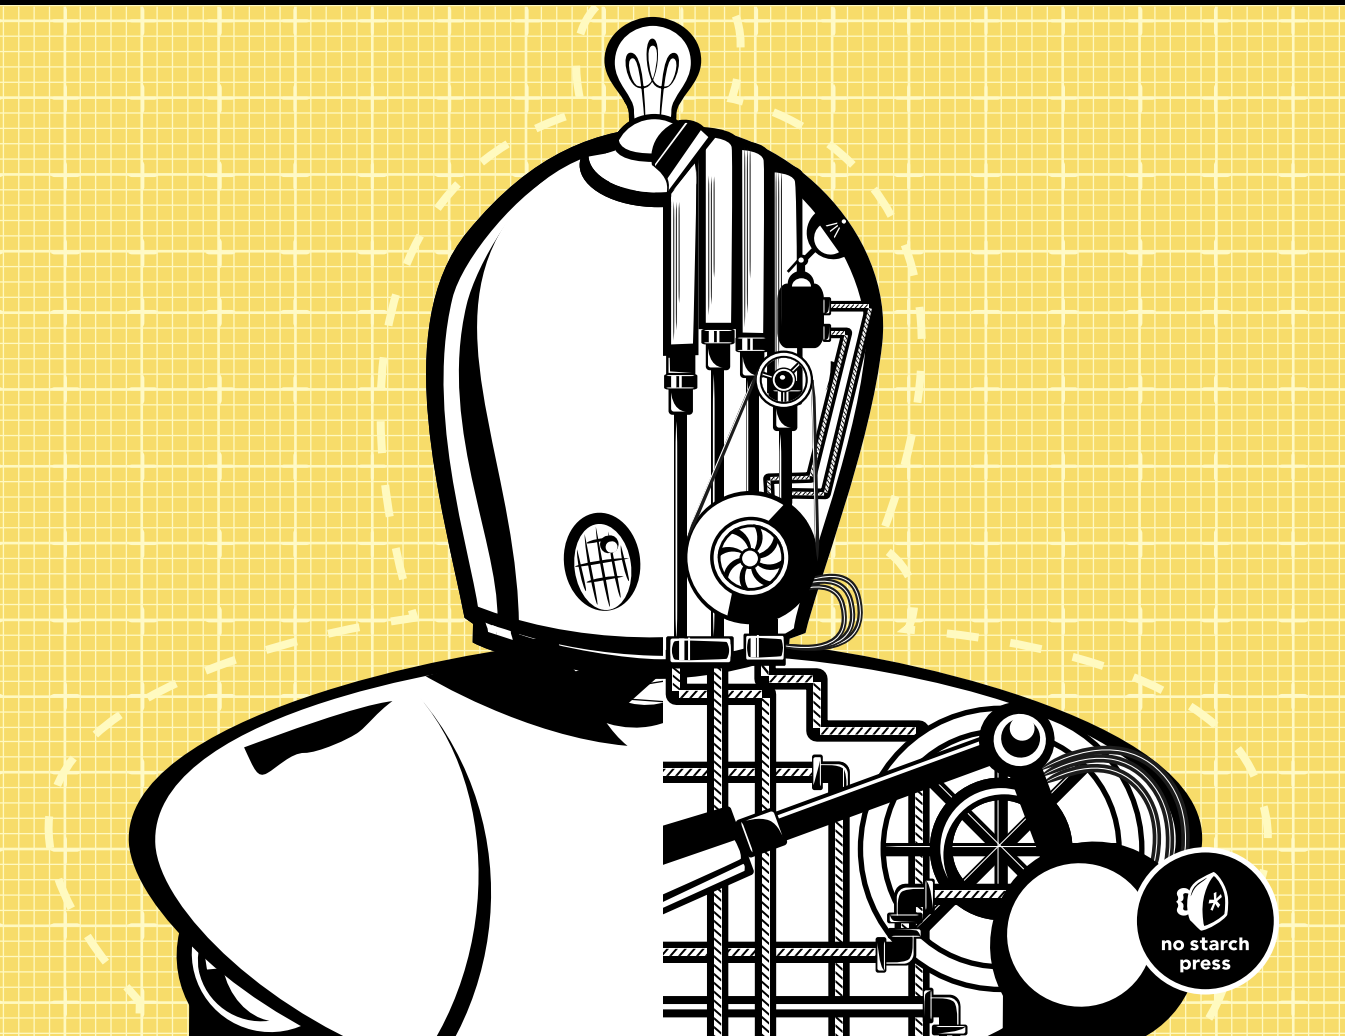
2ND EDITION

HOW LINUX WORKS

WHAT EVERY *SUPERUSER* SHOULD KNOW

BRIAN WARD



no starch press

PRAISE FOR THE FIRST EDITION OF *HOW LINUX WORKS*

"A great resource. In roughly 350 pages, the book covers all the basics."
—eWEEK

"I would definitely recommend this book to those who are interested in Linux, but have not had the experience to know the inner workings of the OS."
—O'ReillyNet

"One of the best basic books on learning Linux, written with the power user in mind. Five stars."
—Opensource-Book-Reviews.com

"Succeeds admirably because of the way in which it's organized and the level of technical detail it offers."
—Kickstart News

"This is a very different introduction to Linux. It's unflashy, concentrates on the command line, and digs around in the internals rather than on GUI front-ends that take the place of more familiar MS Windows tools."
—TechBookReport.com

"This book does a good job of explaining the nuts and bolts of how Linux operates."
—Hosting Resolve

BRIEF CONTENTS

Preface xix
Acknowledgments xxiii
Chapter 1: The Big Picture 1
Chapter 2: Basic Commands and Directory Hierarchy 11
Chapter 3: Devices 45
Chapter 4: Disks and Filesystems 65
Chapter 5: How the Linux Kernel Boots 93
Chapter 6: How User Space Starts 111
Chapter 7: System Configuration: Logging, System Time, Batch Jobs, and Users 149
Chapter 8: A Closer Look at Processes and Resource Utilization 171
Chapter 9: Understanding Your Network and Its Configuration 189
Chapter 10: Network Applications and Services 229
Chapter 11: Introduction to Shell Scripts 249
Chapter 12: Moving Files Across the Network 271
Chapter 13: User Environments 287
Chapter 14: A Brief Survey of the Linux Desktop 297
Chapter 15: Development Tools 309
Chapter 16: Introduction to Compiling Software from C Source Code 329
Chapter 17: Building on the Basics 345
Bibliography 351
Index 355

CONTENTS IN DETAIL

PREFACE **xix**

Who Should Read This Book? . . . xx
Prerequisites . . . xx
How to Read This Book . . . xx
A Hands-On Approach . . . xx
How This Book Is Organized . . . xxi
What's New in the Second Edition? . . . xxi
A Note on Terminology . . . xxii

ACKNOWLEDGMENTS **xxiii**

1
THE BIG PICTURE **1**

1.1 Levels and Layers of Abstraction in a Linux System . . . 2
1.2 Hardware: Understanding Main Memory . . . 4
1.3 The Kernel . . . 4
1.3.1 Process Management . . . 5
1.3.2 Memory Management . . . 6
1.3.3 Device Drivers and Management . . . 7
1.3.4 System Calls and Support . . . 7
1.4 User Space . . . 8
1.5 Users . . . 9
1.6 Looking Forward . . . 10

2
BASIC COMMANDS AND DIRECTORY HIERARCHY **11**

2.1 The Bourne Shell: /bin/sh . . . 12
2.2 Using the Shell . . . 12
2.2.1 The Shell Window . . . 12
2.2.2 cat . . . 13
2.2.3 Standard Input and Standard Output . . . 13
2.3 Basic Commands . . . 14
2.3.1 ls . . . 14
2.3.2 cp . . . 15
2.3.3 mv . . . 15
2.3.4 touch . . . 15
2.3.5 rm . . . 16
2.3.6 echo . . . 16
2.4 Navigating Directories . . . 16
2.4.1 cd . . . 16
2.4.2 mkdir . . . 17
2.4.3 rmdir . . . 17
2.4.4 Shell Globbing (Wildcards) . . . 17

2.5 Intermediate Commands . . . 18
2.5.1 grep . . . 18
2.5.2 less . . . 19
2.5.3 pwd . . . 19
2.5.4 diff . . . 20
2.5.5 file . . . 20
2.5.6 find and locate . . . 20
2.5.7 head and tail . . . 21
2.5.8 sort . . . 21
2.6 Changing Your Password and Shell . . . 21
2.7 Dot Files . . . 21
2.8 Environment and Shell Variables . . . 21
2.9 The Command Path . . . 22
2.10 Special Characters . . . 23
2.11 Command-Line Editing . . . 24
2.12 Text Editors . . . 24
2.13 Getting Online Help . . . 25
2.14 Shell Input and Output . . . 27
2.14.1 Standard Error . . . 27
2.14.2 Standard Input Redirection . . . 28
2.15 Understanding Error Messages . . . 28
2.15.1 Anatomy of a UNIX Error Message . . . 28
2.15.2 Common Errors . . . 29
2.16 Listing and Manipulating Processes . . . 30
2.16.1 Command Options . . . 31
2.16.2 Killing Processes . . . 31
2.16.3 Job Control . . . 32
2.16.4 Background Processes . . . 32
2.17 File Modes and Permissions . . . 33
2.17.1 Modifying Permissions . . . 34
2.17.2 Symbolic Links . . . 35
2.17.3 Creating Symbolic Links . . . 36
2.18 Archiving and Compressing Files . . . 37
2.18.1 gzip . . . 37
2.18.2 tar . . . 37
2.18.3 Compressed Archives (.tar.gz) . . . 38
2.18.4 zcat . . . 39
2.18.5 Other Compression Utilities . . . 39
2.19 Linux Directory Hierarchy Essentials . . . 40
2.19.1 Other Root Subdirectories . . . 41
2.19.2 The /usr Directory . . . 41
2.19.3 Kernel Location . . . 42
2.20 Running Commands as the Superuser . . . 42
2.20.1 sudo . . . 42
2.20.2 /etc/sudoers . . . 43
2.21 Looking Forward . . . 43

3
DEVICES **45**

3.1 Device Files . . . 46
3.2 The sysfs Device Path . . . 47

3.3 dd and Devices . . . 48
3.4 Device Name Summary . . . 49
3.4.1 Hard Disks: /dev/sd* . . . 50
3.4.2 CD and DVD Drives: /dev/sr* . . . 51
3.4.3 PATA Hard Disks: /dev/hd* . . . 51
3.4.4 Terminals: /dev/tty*, /dev/pts/*, and /dev/tty . . . 51
3.4.5 Serial Ports: /dev/ttyS* . . . 52
3.4.6 Parallel Ports: /dev/lp0 and /dev/lp1 . . . 52
3.4.7 Audio Devices: /dev/snd/*, /dev/dsp, /dev/audio, and More . . . 53
3.4.8 Creating Device Files . . . 53
3.5 udev . . . 54
3.5.1 devtmpfs . . . 54
3.5.2 udevd Operation and Configuration . . . 55
3.5.3 udevadm . . . 57
3.5.4 Monitoring Devices . . . 57
3.6 In-Depth: SCSI and the Linux Kernel . . . 58
3.6.1 USB Storage and SCSI . . . 61
3.6.2 SCSI and ATA . . . 62
3.6.3 Generic SCSI Devices . . . 63
3.6.4 Multiple Access Methods for a Single Device . . . 63

4
DISKS AND FILESYSTEMS 65

4.1 Partitioning Disk Devices . . . 67
4.1.1 Viewing a Partition Table . . . 68
4.1.2 Changing Partition Tables . . . 69
4.1.3 Disk and Partition Geometry . . . 70
4.1.4 Solid-State Disks (SSDs) . . . 72
4.2 Filesystems . . . 72
4.2.1 Filesystem Types . . . 73
4.2.2 Creating a Filesystem . . . 74
4.2.3 Mounting a Filesystem . . . 75
4.2.4 Filesystem UUID . . . 76
4.2.5 Disk Buffering, Caching, and Filesystems . . . 77
4.2.6 Filesystem Mount Options . . . 77
4.2.7 Remounting a Filesystem . . . 79
4.2.8 The /etc/fstab Filesystem Table . . . 79
4.2.9 Alternatives to /etc/fstab . . . 80
4.2.10 Filesystem Capacity . . . 81
4.2.11 Checking and Repairing Filesystems . . . 82
4.2.12 Special-Purpose Filesystems . . . 84
4.3 Swap Space . . . 85
4.3.1 Using a Disk Partition as Swap Space . . . 85
4.3.2 Using a File as Swap Space . . . 85
4.3.3 How Much Swap Do You Need? . . . 86
4.4 Looking Forward: Disks and User Space . . . 86
4.5 Inside a Traditional Filesystem . . . 87
4.5.1 Viewing Inode Details . . . 89
4.5.2 Working with Filesystems in User Space . . . 90
4.5.3 The Evolution of Filesystems . . . 91
